SIMPLE. DURABLE. VERSATILE.
You asked, we delivered.

There are two ways to design a machine. One approach is to strap your customers' boots on and build something you assume they need. Or, you can let them wear their own boots as they tell you what's really needed in the field. Before we set out to build the BPX9000, we listened closely to what our customers wanted and needed in a bale processor. They kept asking for the same things: Simplicity, Durability and Versatility. So that's the bale processor we built.

An optional square bale kit lets you process large square bales evenly and consistently.
