Mix 30+

IMPROVES CONCEPTION &
RETENTION RATES BY 33.5%

In a world 90 day breeding trial on 130 head of Angus cows weighing 1,247 lbs. with body condition scores of 5.6 were divided and placed into 12 paddocks on two University of Kentucky's research farms. Cows were placed on high endophyte infested pastures with no shade.

Mix 30+ was fed 30 days prior and 60 days after breeding. Control cows received a hand fed ration of corn & soybean meal to match the energy and protein levels of cows that were fed Mix 30+. Mix 30+ cows body condition improved. Serum thyroxine levels were reduced (measurement through the blood to measure stress on an animal) body temps were lowered (many cows cycle poorly in extreme heat and many pregnancies are aborted during the early part of the first trimester of their pregnancies).

Mix 30+ BENEFITS BASED ON THE STUDY

- 33.5% more cows were bred & retained their pregnancy
- 21 pound body condition increase
- Nearly a 1 degree decrease in body temperature
- 14% decrease in Serum Thyroxine levels

Let Mix30+ help your cattle operation become more profitable.
